19/January/2020

To whom it may concern:

Our company MyCity hired Andrej Nikolić in April 2015, as a full-time front-end developer and a graphic designer.

With selfless sacrificial work, he participated in the creation of many websites that we have developed for our clients. Many of them were done from-the-scratch in HTML, CSS and JavaScript, with responsive design and optimization work being done so we could get the sites loading speed in less than 2 seconds. We have to mention that we also did a lot of WordPress sites, where Andrej showed exceptional ability to set up all the plugins in a very short time and adapt the theme to look exactly how the client wanted.

The biggest project we worked with Andrej was a frontend for one of the most famous Austrian shopping mall, which was coded from-the-scratch and where we had to work overtime in order to meet deadlines.

Over time, our company has refocused on website hosting services, and there was no longer a lot of work for Andrej at our company, which is the only reason why we had to part with him. Because of selflessness and sociable character, Andrej was considered part of our family in the company, and we are very sorry that we had to end the cooperation.

Sincerely,
Predrag Damjanović, CEO
